

*Sasha's International, Inc: The best quality parts at the best available prices!*

# Battery Industry News

**Exciting Industry Trends from the B.I.N.**

## MISSION STATEMENT

We at Sasha's International, Inc. are committed to bringing you the best prices, service and information. That is why we have created a monthly newsletter for our customers, letting them know some of the exciting new technologies and products that we are offering. As always, if you should need any specific part, information, or assistance with a product, please feel free to call, fax, or email us.

**-Dimitri Andonov, General Manager**

## NEWS

### **Sasha's International Inc. has recently moved!!!**

Sasha's International, Inc.  
333 Arthur Godfrey Road, Suite 322  
Miami Beach, FL 33140 U.S.A.  
TEL: 305/695-8990 FAX: 305/695-8991

## NEW EQUIPMENT SPOTLIGHT

- Less Energy Costs!**
- 10% Improvement in productivity!**
- Shorter Spray Time!**
- Mix with water only!**
- No Sodium Silicate!**

**GLOBE SUPRKOTE** – Globe Suprkote offers you numerous benefits which will improve your productivity up to 10% and greatly enhance your profits. Globe Suprkote is more than an insulator. It has excellent surface texture and venting characteristics. It is easy to mix and apply, and requires only a light brushing to remove.

The higher elasticity of the Globe Suprkote gives you less cracking and chipping of the mold coat, and more resistance to temperature changes. This means Globe Suprkote will last much longer allowing you to produce grids with less frequent stops for respraying.

The material is packaged for export at no extra charge. Since Globe Suprkote is shipped dry, and mixed with water at your plant, the freight costs are less than other brands requiring sodium silicate.

## NEW EQUIPMENT AVAILABLE

SFA-FS-2A fully automatic 2 station vacbox filler

**VACBOX FILLER** – New technology with new vacuum filling system for AGM and GEL batteries. This VACBOX Filler allows for a considerable reduction of filling time. It allows for the best penetration of acid, with no air spots. It has high filling precision, filling control by scales and is a fully automatic process. There is no damage to battery cells because there is the same pressure inside and out, as well an innovative antidripping system which prevents acid dripping.

**ACID FILLER** – This new acid filler is becoming very popular. It can be used for initial fill, or top-off filling. It puts the right amount of acid into each cell, so that there is no need for a vacuum process after the fill. There is a 2, 3, or 4 head machine depending on your production needs. It uses templates to locate the fill nozzles, so change-overs are done very quickly.

**DISCHARGER TESTER** - The modular discharger is an innovative product designed for 12V automotive batteries, end production line testing at a high current rate. The POWERMOS technology allows the ability to reduce the discharged current ripple down to zero, and better measures accuracy and fast transient response in comparison with the traditional discharge testers.
